

Password Reset Guide

If you can't sign in, you can reset your password in under two minutes.

Steps: 1. Go to the sign-in page and click Forgot password. 2. Enter the email associated with your account. 3. Check your inbox for a message from no-reply@support.example within 1-2 minutes. Check Spam if needed. 4. Click the secure reset link. The link expires after 30 minutes. 5. Enter a new password of at least 12 characters with one number and one symbol. 6. You will be signed in automatically after a successful reset.

Troubleshooting: - Link expired: request a new reset email; only the most recent link is valid. - Email never arrives: verify the address on file, check spam, whitelist support.example. - Password too weak: use a longer passphrase with mixed case and a symbol. - Two-factor enabled: after resetting you will still be prompted for 2FA on next sign-in.

If repeated attempts fail, contact support with the timestamp of your last reset attempt.
